Tokeny

Project Progress Update

A comprehensive digital asset tokenization platform — built for compliance, scale, and real-world investment workflows.

REPORT DATE	PROJECT PHASE	OVERALL STATUS
April 13, 2026	Sprints 1–7 Complete	✅ On Track

OVERVIEW

What We Are Building

> A **digital asset tokenization platform** — a secure, web-based system that allows companies to issue and manage tokenized real-world assets (real estate, bonds, commodities, art, etc.) and allows investors to discover, purchase, and track those assets. Think of it as a **regulated digital marketplace for tokenized investments**, built to meet international compliance standards from day one.

SPRINTS DONE | APPS BUILT | TESTS PASSING | CORE FEATURES

FEATURES DELIVERED

What Has Been Completed

User Accounts & Security

- ✓ Registration and login system
- ✓ Two-factor authentication (2FA)
- ✓ 3 separate portals — Investor, Issuer, Admin
- ✓ Role-based access (each user sees only what they should)
- ✓ Secure, encrypted passwords and sessions

Investor Portal

- ✓ Personal portfolio dashboard
- ✓ Browse all available tokenized assets
- ✓ View token details, price, and supply
- ✓ Buy tokens via Stripe payment checkout
- ✓ KYC status and verification tracking

Issuer Dashboard

- ✓ Create and launch new tokens
- ✓ Manage token lifecycle (active, paused, frozen)
- ✓ Cap table — see all token holders
- ✓ Set investor eligibility rules
- ✓ Approve investor whitelist

Admin Console

- ✓ Full platform overview and analytics
- ✓ User and company management
- ✓ Audit logs for every action
- ✓ System health monitoring
- ✓ Multi-tenant support (multiple companies)

KYC Verification

- ✓ Investors submit identity documents
- ✓ Secure document storage
- ✓ Manual review and approval workflow
- ✓ KYC status reflected across all portals

Compliance Engine

- ✓ Configurable eligibility rules per token
- ✓ Country and accreditation restrictions
- ✓ Automatic enforcement at purchase
- ✓ Investor whitelist management

Payments

- ✓ Full Stripe payment integration built

Blockchain (ERC-3643)

- ✓ Industry-standard compliant security tokens

- ✓ Secure checkout flow
- ✓ Order history and status tracking
- ✓ Ready to go live with Stripe keys

- ✓ Smart contracts fully written and tested
- ✓ 71 automated contract tests — all passing
- ✓ Ready to deploy on Ethereum or Polygon

DEVELOPMENT TIMELINE

Sprint-by-Sprint Progress

1

Foundation & Architecture

Project structure, database, API gateway, core infrastructure

● Complete

2

User Authentication

Register, login, JWT tokens, two-factor authentication

● Complete

3

Token Management

Token creation, lifecycle management, smart contract integration

● Complete

4

Compliance & KYC

Identity verification, eligibility rules, document management

● Complete

5

Blockchain Integration

ERC-3643 smart contracts, 71 automated tests, local simulation

● Complete

6

Payments & Notifications

Stripe checkout, in-app notifications, transaction history

● Complete

7

Admin Console

Platform management, analytics, audit logs, multi-tenant support

● Complete

QUALITY ASSURANCE

Testing & Reliability

AREA	TESTS	RESULT
Backend API — all 7 microservices	44 automated tests	● All Passing
Smart Contracts (Blockchain logic)	71 automated tests	● All Passing
Frontend pages (all 3 portals)	23 pages verified	● All Loading
Database integrity	14 tables, real data	● Healthy

DEMO READINESS

Ready to Show Right Now

> The platform is **fully functional**. You can register as an investor, issuer, or admin — create a real token, browse the marketplace, submit KYC documents, and initiate a purchase. A demo server deployment guide is ready and the platform can be **live on the internet within a few hours**.

ACTION	STATUS
Register / Login as any role	● Live
Create and launch a new token	● Live
Browse tokens as an investor	● Live
Buy tokens (checkout flow)	● Live
Submit KYC documents	● Live
Admin platform management	● Live
Real-time notifications	● Live

ACTION	STATUS
Smart contract on real blockchain	Simulation (testnet ready)

ROADMAP

What Comes Next

🌐 **Live Server Deployment** — Pending

Deployment guide is ready. Needs a server ($24/month) and your domain name to go fully live on the internet.

💳 **Live Stripe Payments** — Pending

Payment system is fully built. Needs your Stripe account keys to process real transactions.

⛓️ **Real Blockchain (Ethereum Testnet)** — Pending

Smart contracts are ready. Needs a free API key from Infura or Alchemy to deploy on Sepolia testnet.

📧 **Email Notifications** — Pending

In-app notifications are live. Email delivery needs an AWS SES or SendGrid account.

🛒 **Secondary Marketplace** — Future Phase

Peer-to-peer token trading between investors. Planned for a future phase.

ACCESS

Portal URLs (After Deployment)

PORTAL	WHO USES IT	URL
Investor App	Individual investors browsing and buying tokens	`investor.demo.tokeny.com`
Issuer Dashboard	Companies creating and managing tokens	`issuer.demo.tokeny.com`

PORTAL	WHO USES IT	URL
Admin Console	Platform operators managing the whole system	`admin.demo.tokeny.com`
